

The E-Spot FireBox produces a long-range, focused beam pattern using four LEDs with deep parabolic reflectors to spotlight an area with focused bright light. An articulating head allows you to aim light where it is needed. Its large push-button switch is easy to use with heavy gloves and a large grip area makes for easy hand-offs.

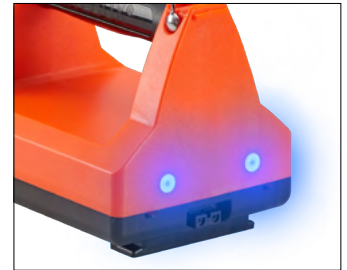

Flat side allows light to tilt and stand on its own to light up a scene

Handle clearance accommodates heavy gloves, making hand-offs easier

Multi-function, push-button switch features battery status indicator

Ultra-bright blue taillight LEDs ensure you can be seen, even from behind
